NAPKIN MAKE & PLACE SYSTEM

(Automated Napkin Converting)

The DLN-300 Napkin Machine System is a fully automated napkin folding and placing system.

The DLN-300D is a dedicated system with self-drive. Change parts are available for a choice of cut-off lengths from 10" to 17".

The DLN-300A model adds the electronic napkin length and tuck position adjustment feature with self-drive.

The system is designed to maintain low linear tension on the paper stock, reducing the chance of web break. Cross machine fold capability employs low pressure air jet tucking.

The outfeed rolls, which control the placement, are cantilevered from one side of the frame to allow o-ring changing without disassembly. Also, they raise easily to allow immediate access for maintenance.

Exclusive Features:

- Speeds up to 400 cycles per minute
- Size options up to 17" x 17"
- Make and place into GPS wrapping machines
- Proven design, rugged construction, great accuracy
- High efficiency air tucking
- High quality product
