## AccuWrap™ Shrink Tunnel System

(AccuWrap Controlled)

**George Gordon Associates** presents the AccuWrap modular shrink packaging system. The integrated shrink tunnel with ultimate control of the shrink process will ensure an esthetically pleasing package to meet your specification and will be fully integrated both electrically and mechanically.

The shrink tunnel system is heavy-duty stainless steel construction with insulated walls for low energy consumption. The integrated shrink tunnel will have control of the shrink process to effectively package the various food or other products.

The heat shrink tunnel's precision design provides temperature control for shrinkage at a high rate of speed using a variable speed, mesh belt conveyor, perforated Teflon belt or other belting to meet your requirements.

Variable Direction Airflow allows uni-directional airflow adjustment to provide the precision heat delivery to form the most esthetically pleasing package. This feature along with the air velocity control gives unprecedented package appearance even for irregular shaped products.

The product travels through the tunnel on the mesh style belt. Adjustable airflow affords just the right amount of air movement through the tunnel. A set of precision baffles control how the air moves over the package to give a tight, high quality wrap for the product, without over shrinking and burnouts. Fast efficient integrated packaging is accomplished with your AccuWrap shrink tunnel with features tooled to fit your application.

### Exclusive Features:

- **Variable Directional Airflow**
- **Adjustable airflow within the tunnel**
- **Easy open clamshell cover**
- **Product viewing windows**
- **Variable air velocity control**
- **Temperature and belt speed controls**
- **Low profile and small footprint**
- **Lift out rails for easy cleaning and maintenance**
- **Building Block Modularity™**
- **Easy clean conveyor modular**
- **AccuWrap integrated or standalone**

**GEORGE GORDON ASSOCIATES**

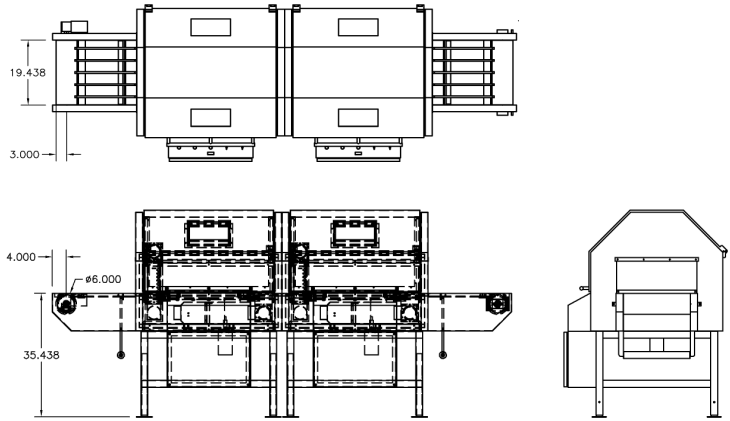

COMPREHENSIVE PACKAGING SYSTEMS

# Model FG-5000T AccuWrap™ Shrink Tunnel System

## Features:

- 8" high and 20" wide Tunnel openings
- Energy Efficient
- Insulated heat tunnel
- Temperature and belt speed controls
- Low profile and small footprint
- Product viewing window
- Lift out rails for easy cleaning and maintenance
- Building Block Modularity™

## Options:

- # of Chambers
- 230 VAC Option
- Stand Alone
- Stainless Steel Mesh -Teflon Belt - Other

## Technical Data

Electrical: 480 VAC, 50/60 Hz, 3 PHASE  
Current: 40 Amps  
Speed: Variable from 25 to 150 ft./min.

## Order Number-

FG-5000T -X-X-X-X-X-XXXX

-#: Number of Chambers

-230: 230 VAC

-480: 480 VAC

-A: AccuWrap Integrated

-S: Standalone Electronics

-SS: Stainless Steel Mesh Belt

-TB: Teflon Belting Mesh Belt

-SB: Special Belting Required
