

Model SP2-250

ON-LINE STRAW PLACING SYSTEM

(Places Flex Straws)

The SP2-250 on-line Straw Placing System will place straws including flex straws.

The placing is accomplished with a rotary feed wheel designed to allow room for the flex straw to bend and still be placed effectively without jamming.

Other straws or similar cylindrical items may also be placed. With a simple five minute changeover diameters from 0.156" to 0.316", may be accommodated in lengths from 5" up to 10".

Each placing system is capable of placing items at production rates up to 240 cycles per minute.

The SP2-250 system uses a hand loaded hopper with see-through side panels which are moveable for different lengths.

The rugged design allows trouble-free operation.

Exclusive Features:

- Place flex straws, milk straws, double straws, and other cylindrical objects
- Feed wheel design with room for flex
- Indexing motion placing at speeds up to 240 cycles per minute
- Five minute size changeover from 0.156" to 0.316"
- Moveable hopper size side panels for 5" to 10" length
- Stand-alone self-drive
