

Model TCS-3000

TOWEL CONVERTING SYSTEM

(Dedicated Towel System)

The Model TCS-3000 is an automated towel converting system that will make and place, or make and stack, from a 48-inch roll of non-woven material.

The TCS-3000 system features a rugged design for high efficiency and low ownership cost. The system produces folded towels from 12" x 12" up to 24" x 24" with various non-woven materials. Cut-off length may be varied from 12" up to 24" with an easy mechanical changeover. A series of precision air jets make the cross fold with no moving parts for easy maintenance. The single lane, simplified horizontal outfeed system will collect and stack up to twenty-five (25) towels, depending on the material.

Other features include enhanced web support, tracking, and tension control for more consistent product. Highly flexible production, with a wide variety of finished towel sizes, the TCS-3000 is ideally suited for specialty non-woven towel applications.

Exclusive Features:

- Produces up to 240 folded towels per minute
- Web material widths from 12" to 24"
- Parent roll diameter to 48"
- Standard cut-off length of 12" to 24"
- Cross folding with air tuck
- Other cut-off lengths available with factory-supplied modification kits
- Small footprint

COMPREHENSIVE PACKAGING SYSTEMS

Model TCS-3000 TOWEL CONVERTING SYSTEM

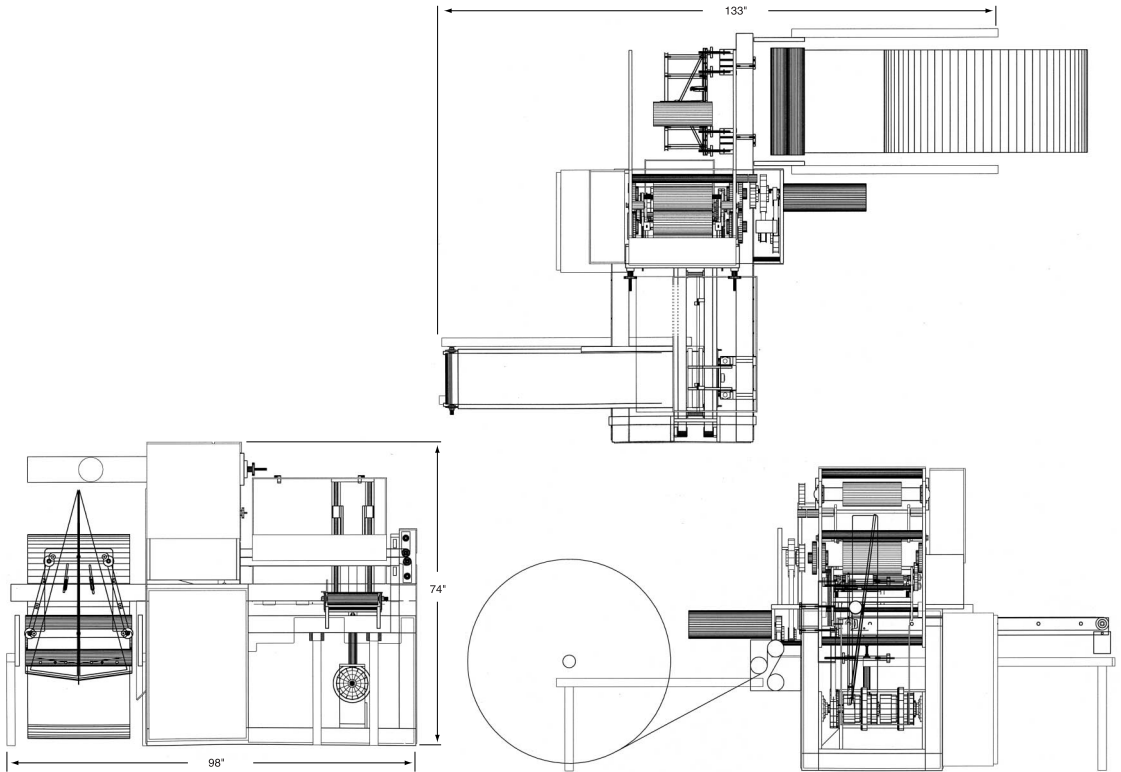

Model:
TCS-3000

Features:

- Widths from 12" to 24"
- Horizontal Outfeed
- Air Tucking

Options:

- Embossing
- Printing

Technical Data

Electrical: 230 VAC, 3 phase, 60 Hz
Current: Approximately 16 Amps
Compressed Air: 1 cfm @ 80 PSIG
Product Size: 12" x 12" up to 24" x 24"

Order Number

TCS-3000 -X - X - X

- E = Embossing Option
- 0 = No Embosser
- P = Printer Option
- 0 = No Printer
- # = Number indicates fold width
